KEYMIND

ARTIFICIAL INTELLIGENCE CONSULTING

1 About us

KeyMind is a consulting firm of Artificial Intelligence and AI-integration services for business, with the aim of aiding our clients with innovative technology, quality service and creativity. Building successful relationships, we've collaborated with a variety of companies from all kind of industries to offer our solutions.

1.1 Vision

At Keymind Consulting we aspire to become a forefront consulting company that transforms businesses and industries through cutting-edge technology, innovative solutions, and actionable insights. We strive to enable our clients to harness the full potential of artificial intelligence that allow scaling and improving a wide range of applications.

1.2 Mission

At Keymind Consulting, our mission is to provide unparalleled expertise in artificial intelligence services and products, besides data-driven solutions to propel businesses forward. Through a collaborative approach, we empower organizations to embrace AI technologies, optimize processes, and make smarter decisions, ultimately driving innovation and sustainable growth in today's technological landscape.

1.3 Added Value

At KeyMind, we offer unparalleled AI expertise, empowering you with state-of-the-art technologies to stay ahead in today's fast-paced digital landscape. Experience the speed and efficiency of our solutions, as we work tirelessly to drive your success through innovative AI strategies

1.4 Our Team

We're serious, not boring! As a team, our concern is to satisfy our client's expectations with experience and creativity, delivering optimal solutions.

1.4.1 Chief Executive Officer

As a co-founding partner and CEO, Pablo Quihui is at the helm of KeyMind. His leadership guides the company's vision with a strategic direction that fuels growth and firmly establishes KeyMind as a fundamental player in the field of software and AI services.

1.4.2 Chief Technology Officer

As CTO, Axel García provides key tools for making research and applying AI for providing our clients with cutting-edge technology to benefit our client business. In more depth, he is constantly doing research of the state-of-the-art in computer vision, data science and novel crazy stuff done with AI.

1.4.3 Chief Information Officer

As our Chief Information Officer (CIO), David plays a pivotal role in shaping our startup's technical direction and ensuring the successful delivery of cutting-edge solutions. David's passion, creativity, and unwavering commitment are instrumental in driving innovation and excellence within our organization.

1.4.4 Collaborators

In addition to our core team, our journey towards excellence is fortified by a diverse group of dedicated collaborators. Their collective expertise, creativity, and shared commitment contribute to our innovative endeavors, further solidifying our position as leaders in the AI consultancy field. Together, we are driven by a shared vision for success and continue to break new ground in the world of artificial intelligence.

2 Our Identity

We believe that our clients' success and AI are the present. Therefore, our offer based on our values, commitment, innovation and versatility, can drive AI meets any business.

At KeyMind, we're not just another AI consultancy; we're the architects of innovation, the guardians of commitment, and the embodiment of versatility. Our identity is rooted in a relentless pursuit of excellence, where we fuse cutting-edge technology with unwavering dedication to our clients.

Our commitment is not a mere promise; it's a pact to go above and beyond in delivering AI solutions that transform businesses.

Innovation is our lifeblood, flowing through every line of code we write, every strategy we devise, and every problem we solve.

Versatility is our hallmark, adapting seamlessly to the dynamic landscape of AI. In a world of constant change, KeyMind stands firm as a beacon of integrity, progress, and limitless possibility.

3   Our Services

We provide an extensive catalogue of services encupsuled in two main services: Artificial Intelligence and AI-integrated solutions. Nevertheless, we're open to hear your ideas and know how KeyMind can help in the growth of your business project.

3.1   AI Services

Unlock the potential of AI with our expert team. We provide tailored AI solutions to enhance decision-making, automate processes, and improve customer experiences.

- **ChatBots:** Stop using FAQs section in your websites! At KeyMind, we believe in going beyond the ordinary. We specialize in creating customized chatbots designed to fit seamlessly into your business model. These chatbots serve as your virtual representatives, engaging with your audience in real-time, answering questions, and providing personalized assistance. Say goodbye to static FAQs, and say hello to the future of interactive, AI-driven customer support.

- **Computer Vision:**

  KeyMind's Computer Vision services are like giving your visuals a pair of magic glasses. We use cutting-edge technology to enable computers to "see" and interpret images and videos. Think of it as turning your camera into a smart assistant that can recognize objects, categorize images, and even make sense of text in photos. Whether it's helping retailers improve inventory management by tracking products, enhancing security through facial recognition, or assisting healthcare professionals in medical image analysis, our Computer Vision services open up a world of possibilities for your business.

- **Data Science and Engineering:**

  We take data analysis to the next level at KeyMind. By harnessing the power of advanced mathematical models and machine learning tools, we transform your data into actionable insights. Our data experts excel at not just analysis and processing but also predictive analytics, helping you stay ahead of the curve. With KeyMind, your data isn't just information – it's a strategic asset that drives informed decisions and propels your business toward success.

- **Audio Processing and Natural Language Processing:**

  Unlock the power of sound for your business! Our audio processing solutions capture valuable insights from conversations and audio data, transforming

noise into actionable information. Imagine automatically categorizing music to curate engaging playlists, or enhancing customer service by analyzing call center interactions. Our services harness the potential of sound to elevate your business, making it easier to connect, engage, and gain valuable insights from the world of audio.

3.2   AI-integrated Services

Elevate your digital presence with our web/app solutions. From development to maintenance, we deliver reliable, user-friendly web, mobile and desktop applications tailored to your needs. In addition to integration of cloud services.

- **AI-powered Web/App:**

  KeyMind provides novel web and mobile app development with embedded AI capabilities. Whether you need automatic transcription, image recognition, sentiment analysis, or any other AI-powered feature, we have you covered. We don't just build webpages and apps; we enhance them with customized AI models to fulfill your unique business needs. Explore the limitless possibilities of AI integration with KeyMind's web/app development services.

- **Cloud Engineering:**

  At KeyMind, we excel in harnessing the full potential of cloud technology to drive your business forward. Our cloud engineering services ensure seamless migration, scalability, and secure data management. With our expertise, your organization can enjoy the benefits of flexible, cost-effective, and highly available cloud solutions that empower your digital transformation journey.
